

Final Sprint Review and Retrospective

Group Name: DRIV Studios

Name of Participating Members: Ria Rajan, Deep, Ilya, Vidyut

Start Date of Sprint: 5/10/2020

End Date of Sprint: 5/20/2020

Original Sprint Goals: Format all statistics and complete the recommend feature page.

Current Scum Master: Deep

Current Product Owner: Vidyut

Review

1. What was accomplished in this Sprint?

In this Sprint, we were able to finalize our app by formatting all our statistics into a user-friendly screen, while testing our app with users. We also turned in our deliverables and finished out final presentation.

2. What (if anything) has changed in your environment?

Ilya was in Florida and was not there in our Sprint 4 meeting. Additionally, some of our group members had finals this week and last week which made meeting with our group outside of class time difficult. Other than this, nothing has changed in our environment.

3. What (if any) adjustments did you make to your backlog based on the results of this Sprint?

We were forced to cut out certain features from our backlog given this was our final sprint. Though, many of those features are a part of our future plans of this app.

Retrospective

Evaluate how this Sprint went with regards to individuals, interactions, processes, and tools. Based on this evaluation answer the following questions.

1. What went well during this Sprint?

We were able to conclude our project in a way that we were pleased. Good communication between team members ensured we were on the same page and were satisfied by the outcome.

2. What problems were encountered?

Merging branches for our final product was an issue that we encountered. Between 5 branches all needing to be pushed to main, we were forced to manually merge our

Final Sprint Review and Retrospective

branches.

3. Were these problems solved? If so, how, if not, why?
Yes, we manually merged by copying and pasting code.
4. What are the most helpful changes you could make to improve your effectiveness as a Team if you had another Sprint?

We were too ambitious with our final sprint meeting, so we had too many goals that we couldn't meet. If we had another sprint, we would set more achievable goals and focus on those.

Additionally, we could set up more times outside of class to be available to meet since we had trouble meeting up in this last sprint because some of us had finals this week.
